Summary

Full Stack Developer with 2.5+ years of experience building production web applications with React, Next.js, TypeScript, Node.js and PostgreSQL. Currently building an AI-powered API security platform at Corefix (FTPC): vulnerability management dashboards, Shadow API and API drift detection from HAR and OpenAPI data, and GenAI-assisted remediation. Comfortable owning features end to end, from schema design and REST APIs to UI and containerised deployment.

Skills

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, ShadCN, Material UI

Backend: Node.js, Express.js, REST APIs, JWT and role-based auth, Redis caching, rate limiting, request validation

Databases: PostgreSQL, MongoDB, Prisma ORM, MySQL, schema design, query optimisation

Cloud / DevOps: Docker, Kubernetes (deployment and debugging), AWS (S3, EC2, IAM, CloudWatch), GCP, CI/CD, Linux, Git

AI / Security: OpenAI APIs, LLM summarisation and remediation, WhisperX, OWASP Top 10, CVE/CWE, OpenAPI and HAR analysis, OWASP ZAP

Experience

FTPC – Fusion Technologies Process Consulting

Nov 2025 – Present

Full Stack Developer – Corefix

Remote, India

- Building Corefix, an AI-powered API security platform; earlier worked with the DeepTraq AI team on a pre-hire engagement (Sep–Oct 2025).
- Built vulnerability management dashboards (severity, CVE/CWE, affected URLs, evidence, false-positive handling, risk acceptance, comments) using Next.js, TypeScript, Node.js and PostgreSQL, cutting manual triage effort by ~35%.
- Designed and built Shadow API and API drift detection: normalises endpoints from HAR/network logs (methods, path params, query strings, static-asset filtering) and diffs them against OpenAPI specs to flag undocumented, missing and drifted APIs.
- Integrated LLM-generated finding summaries, remediation guidance and prioritisation into the analyst workflow.
- Hardened backend services with schema validation, rate limiting, Redis caching and a consistent error/response model; containerised services with Docker and debugged deployments on Kubernetes (AWS/GCP).

GorillaHub

Apr 2025 – Aug 2025

Software Developer (Freelance)

Remote, United Kingdom

- Built client-facing full-stack modules with React.js, Node.js and REST APIs.
- Implemented token-based authentication, protected routes and role-based access control across the application.
- Turned business requirements into a reusable library of UI components and backend services shared across features.

Seagull

Jan 2024 – Mar 2025

Full Stack Developer (Contract)

Remote, United Kingdom

- Built and maintained business applications using React.js, Next.js, TypeScript, Node.js, Express.js, Prisma and PostgreSQL/MongoDB.
- Refactored the backend into modular services with Prisma, structured queries and input validation, improving reliability of core API workflows.
- Owned authentication flows, user modules and production debugging for application-level business logic.

Seagull

Jul 2023 – Jan 2024

Web Developer Intern

Remote, United Kingdom

- Built front-end and back-end features for a career and talent discovery web platform using the MERN stack and MySQL.

Projects

WhisperX Transcriber – Batch Audio Transcription

GitHub

Python, WhisperX, PyTorch, CUDA, FFmpeg, Streamlit, Docker

- GPU batch transcription pipeline with speaker diarization, timestamps and CSV/Excel export via a Streamlit UI; reduced manual transcription effort by ~70%.

Rankoraa – Agency Website and Infrastructure

rankoraa.com

Next.js, WordPress REST API, MySQL, Docker, Oracle Cloud, Vercel

- Headless Next.js frontend over a WordPress CMS; self-hosted Dockerised WordPress/MySQL on Oracle Cloud with DNS mapping and Vercel deployment.

Education

VIT Bhopal University

Jul 2019 – Oct 2023

B.Tech, Computer Science and Engineering | CGPA: 6.96 / 10

Bhopal, India
