

Somil Athole

Full Stack Engineer · API security & GenAI tooling

Gurugram, India · sathole2001@gmail.com · linkedin.com/in/somil-athole · github.com/somil14 · somil-athole.netlify.app

SUMMARY

2.5+ years shipping React, Next.js, Node.js and PostgreSQL products. Currently building an API security platform: shadow-API detection, vulnerability triage and AI-written remediation.

EXPERIENCE

Full Stack Developer · FTPC — Fusion Technologies Process Consulting, Corefix unit

Nov 2025 – Present

Full-time · Remote

- Built vulnerability dashboards (CVE/CWE mapping, evidence, false-positive marking, risk acceptance) that cut manual triage by ~35%.
- Built shadow-API and API-drift detection by diffing HAR / network logs against OpenAPI specs.
- Added LLM-generated finding summaries, remediation guidance and prioritisation (OpenAI APIs).
- Hardened services with request validation, rate limiting, Redis caching and a consistent error model; containerised with Docker and deployed on Kubernetes across AWS/GCP.

Software Developer · GorillaHub (UK)

Apr 2025 – Aug 2025

Freelance

- Implemented token-based auth and role-based access control (RBAC).
- Built a library of reusable UI components.

Full Stack Developer · Seagull (UK)

Jan 2024 – Mar 2025

Contract · Remote

- Built product features across React, Next.js, TypeScript and Node.js with Prisma on PostgreSQL and MongoDB.
- Structured a modular backend.

Web Developer Intern · Seagull (UK)

Jul 2023 – Jan 2024

Internship · Remote

UX Design Intern · CBNITS

Feb 2022 – Sept 2022

Internship

- Ran user research and usability testing to inform design decisions.
- Contributed to UX for a large enterprise security product.

PROJECTS

WhisperX Transcriber — Audio-to-text transcription pipeline built on WhisperX; cut manual transcription effort by ~70%. github.com/somil14/Audio-to-Text-Transcriber

RBAC & auth (GorillaHub) — Token-based auth and role-based access control for a UK client.

SKILLS

Production: React, Next.js, TypeScript, JavaScript, Node.js, Express, PostgreSQL, MongoDB, Prisma, Redis, REST APIs, JWT / RBAC, Docker, AWS (S3, EC2, IAM, CloudWatch), OpenAI APIs, API security (OWASP, CVE/CWE, OpenAPI, HAR analysis), Figma / UX research

Working knowledge: Kubernetes, GCP, Python, Tailwind CSS, MySQL, Chrome Extension APIs

EDUCATION

B.Tech, Computer Science & Engineering · VIT Bhopal University · 2019–2023
